Faster heartbeat, butterflies, adrenalin?

**Whatever you feel,
it feels good.**

**A stylish design, fine materials, generous space.
Do you really need a particular destination for your next trip?**

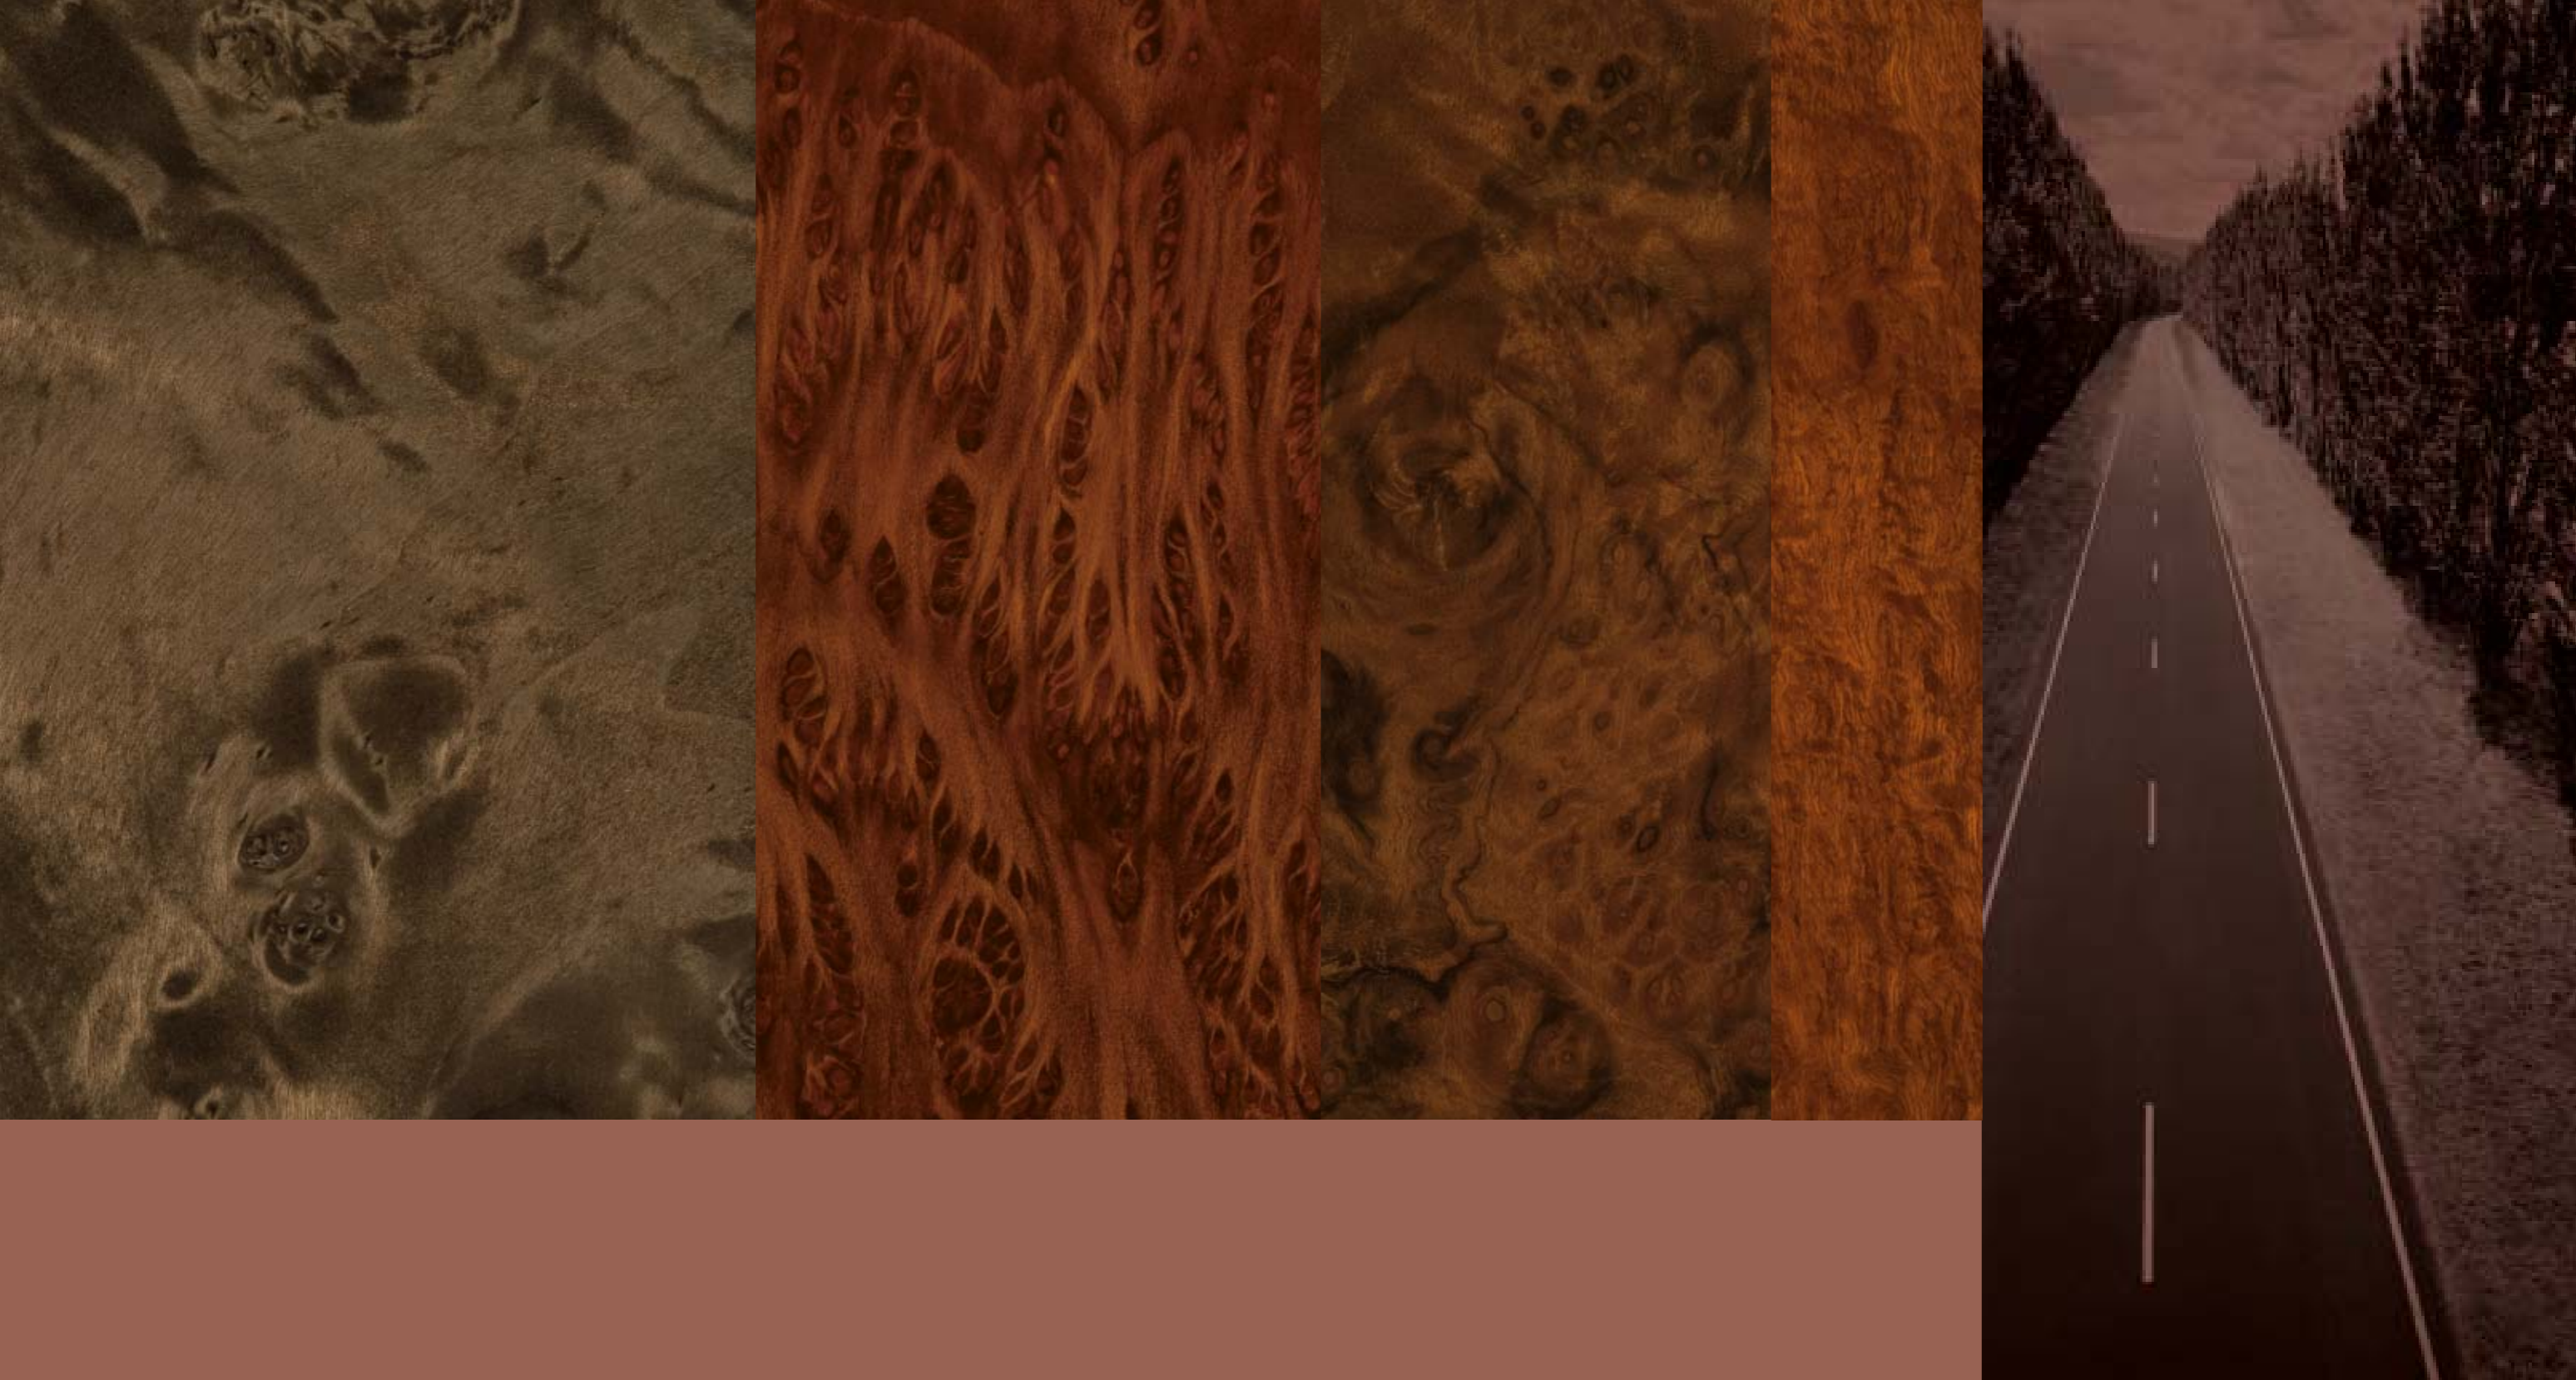

**Lean back, relax and enjoy
450 bhp, 560 Nm, 6.0 l capacity.**

5.50 p.m.

**Feel the burr wood. Feel the finest leather.
Feel your senses awakening.**

A good feeling, touching moments – have you ever asked yourself why so many words to do with human well-being concern the sense of touch? Run your hand over the elegant wood inserts in a Phaeton and you will know why.

**Let someone else think for you for a change.
For example, the electronically controlled air suspension.**

9.00 p.m.

No matter what the weather is like. Or the road surface.
Or traffic. Comfort should never be a question of circum-
stances. There is therefore groundbreaking technology under
every square centimetre of the Phaeton, technology that
makes driving more pleasant and at the same time safer.
For example, the electronic air suspension that ensures opti-
mal roadholding at all times and that you always reach your
destination with a relaxed smile on your face.

Arrive home.

Your Phaeton.

Exterior.

Just as with human faces, a glance at a car is enough to create a feeling of fascination or liking. A car's design is always an expression of its personality.

The design of the Phaeton is characterised by high-grade materials, perfect workmanship and its elegant, unmistakable shape. The Phaeton has clear lines from the arrow-shaped bonnet and charismatic C pillar to the striking, puristic rear end. Every detail is a subordinate part of the elegant whole – for example, the perfectly shaped door handles, discreet chrome trim, minimum gap and joint dimensions, and the door mirrors. In spite of this harmony of design, the Phaeton creates a very spirited impression – from every angle – giving an idea of its “inner values” at first glance. The dynamic, powerful overall impression is highlighted by its gleaming radiator grille, streamlined bumpers with chrome trim and the expressive bi-xenon headlights available as an option.

The elegant, flowing lines of the engine compartment lid, the chromium-plated radiator grille and the optional bi-xenon headlights with adaptive cornering lights and LED daytime driving lights arranged as a light band shape the elegant face of the Phaeton.

Engines.

Passion, the pursuit of perfection, and innovative power. This is the motor that enables our engineers to achieve their goal time after time: to develop superior, groundbreaking engines with which you will reach your destination – as quickly, efficiently and above all as comfortably as possible. This is illustrated by a very innovative diesel engine and three powerful petrol units which, by the way, already comply with the limits set by the Euro 5 standard.

The Phaeton V8. There is a name for the perfect combination of efficiency, power and agility: Phaeton V8. This 8-cylinder unit is a classic example of a balanced engine: developing output of 246 kW (335 bhp) from a capacity of 4.2 litres and energetic torque of 430 Newton metres at 3,500 rpm. It accelerates the Phaeton V8 from 0 to 100 kph in only 6.9 seconds. This performance is achieved in a supreme way that can hardly be surpassed – except by your enthusiasm.

The Phaeton W12. General engine categories are normally defined by the number of cylinders. However, the Phaeton W12 is in a class of its own with the most compact 12-cylinder unit in the world. It develops 331 kW (450 bhp) and torque of 560 Nm from a capacity of 6 litres, accelerating the saloon from 0 to 100 kph in only 6.1 seconds. Acceleration is governed electronically at 250 kph but this should not curb your enjoyment of the Phaeton W12 in any way.

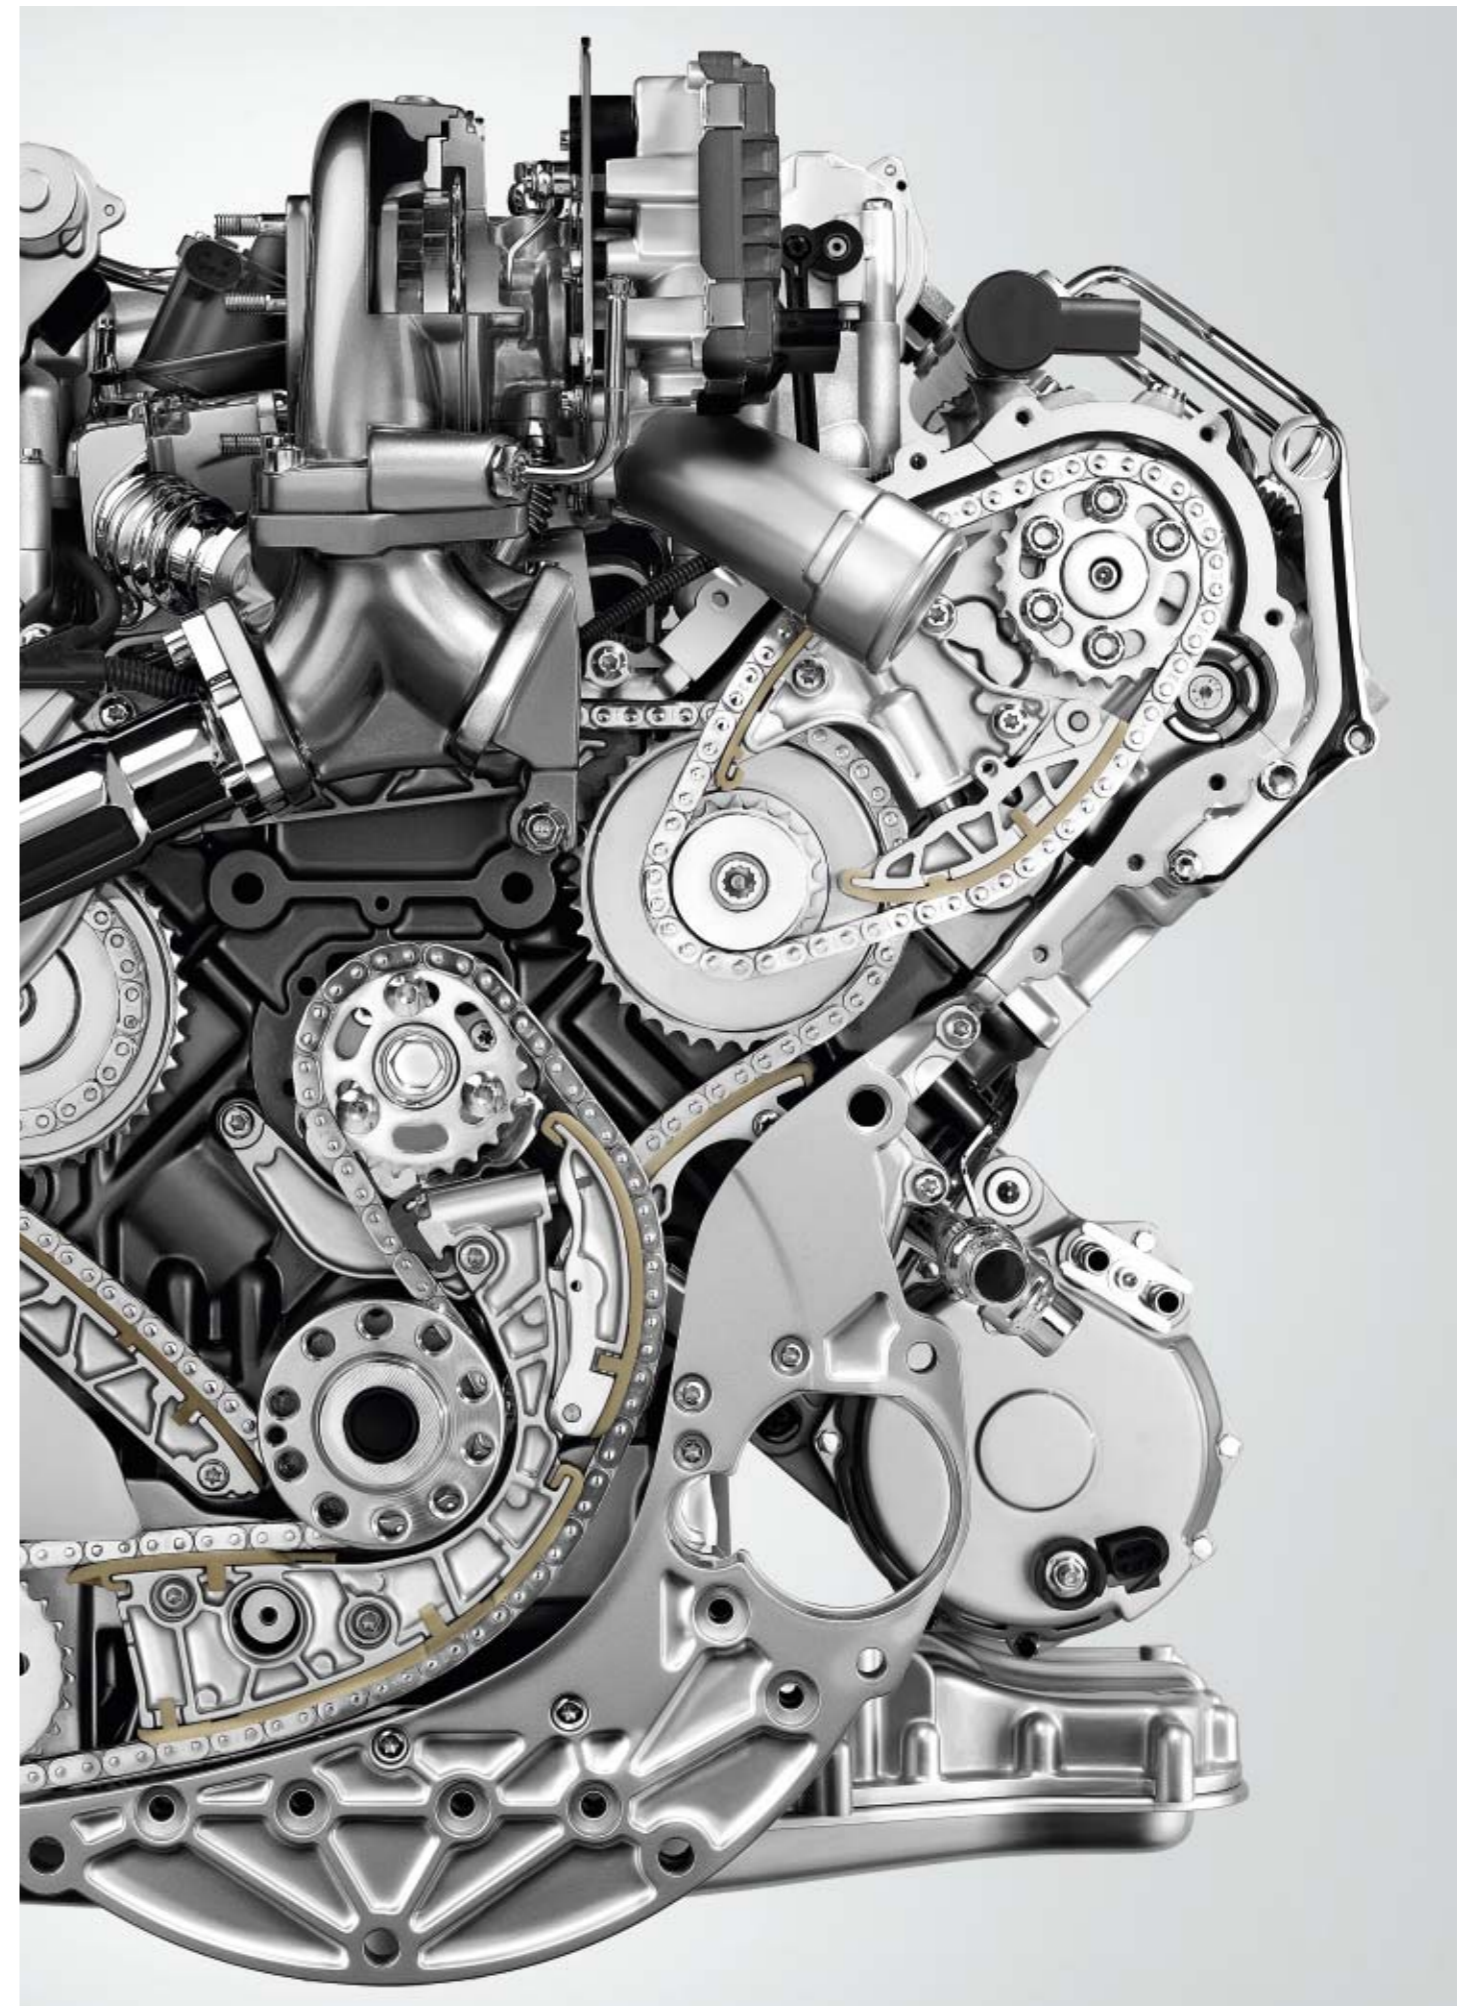

The Phaeton V6 FSI. Low fuel consumption and a high output level: the direct injection principle can successfully be applied to the petrol engines. The new V6 FSI is the best proof of this. With average fuel consumption of 11.7 litres per 100 kilometres it is especially thrifty – without neglecting driving enjoyment. It develops a powerful 206 kW (280 bhp) and 370 Nm torque from a cubic capacity of 3.6 litres. This enables you to accelerate your Phaeton from 0 to 100 kph in 8.6 seconds.

The Phaeton V6 TDI. This technological masterpiece not only has convincing power and economy but also a high level of environmental compatibility. The V6 TDI leaves only small quantities of pollutants in the air – and leaves you with a clear conscience. In contrast to fuel consumption and CO₂ emission, no savings have been made in respect of pulling power and dynamics. The 176 kW (240 bhp) engine develops impressive torque of 500 Newton metres. This means sheer driving enjoyment for you and progress for the environment – and that once again a Volkswagen diesel sets standards in this segment.

Consumption and CO₂ emissions.

		206 kW (280 bhp) V6 FSI 4MOTION ²⁾	246 kW (335 bhp) V8 4MOTION ²⁾	331 kW (450 bhp) W12 4MOTION ²⁾	176 kW (240 bhp) V6 TDI 4MOTION ²⁾ diesel particulate filter ³⁾
Fuel consumption, litres/100 km¹⁾	with automatic gearbox:	6-speed	6-speed	5-speed	6-speed
	urban	17.1	18.9	21.4	12.0
	extra-urban	8.6	9.6	10.5	7.2
	combined	11.7	12.9	14.5	9.0
CO₂ emissions, combined, g/km¹⁾	with automatic gearbox:	273	298	348	239

1) The fuel consumption and emission figures have been determined in accordance with the measuring method stipulated (the version of regulation [EC] 715/2007 which is currently valid). Note in accordance with the version of directive 1999/94/EC which is currently valid: these figures do not refer to a particular vehicle and do not constitute part of the offer but are purely for comparison purposes between the various types of vehicle. In addition to the fuel efficiency of a car, driving behaviour as well as other non-technical factors play a role in determining a car's fuel consumption and CO₂ emissions. CO₂ is the main greenhouse gas responsible for global warming. A guide on fuel consumption and CO₂ emissions which contains data for all new passenger car models is available free of charge at every point of sale in the European Union and, for prospective buyers in Germany, at DAT Deutsche Automobil Treuhand GmbH, Hellmuth-Hirth-Strasse 1, 73760 Ostfildern. 2) Also applies to the model with long wheelbase. 3) The diesel particulate filter is a continuously self-regenerating system. In rare, exceptional cases, individual driving behaviour is to be temporarily adapted to this. Information on this is available at your Volkswagen Dealer and via our telephone No. 0800 – VOLKSWAGEN (0800 – 86 55 79 24 36) which is free of charge in the Federal Republic of Germany).

Running gear.

When required, the air suspension with electronic control raises the running gear automatically by up to 25 mm to assure top-level ride comfort even on uneven stretches. To reduce air drag at high speeds, the running gear is lowered automatically by up to 15 mm.

Only if there is perfectly matched power transmission can the virtues of a first-class engine be converted into ride comfort and driving enjoyment. Several well thought-out running gear systems in the Phaeton ensure that engine power is brought onto the road in an optimum way. For example, the standard air suspension with electronic control which adapts the Phaeton exactly in line with every situation, thereby assuring the best possible roadholding. The running gear is lowered at high speeds, and raised when driving over uneven surfaces. A comfort setting with soft damping assures comfortable travel; when cornering fast, damping is automatically set to be firmer in order to increase stability. The suspension is also self-levelling. It recognises and compensates for weight differences on the vehicle.

Yet however important assistance systems are – a car will only give you pleasure if it takes your individual driving style into account. This is where the dynamic shift programme comes into play. It recognises your preferred driving style and adapts the gearshift pattern accordingly using either a 5-speed (W12) or 6-speed Tiptronic automatic gearbox (V6/V8/V6 TDI). One of the many other technical highlights is the intelligent 4MOTION all-wheel drive which also belongs to the standard specification of every Phaeton. A Torsen differential with sensitive reaction ensures that the distribution of power to each wheel is adapted to road conditions in a fraction of a second. For the driver this means: more safety; noticeably more traction, even in poor weather conditions; and better roadholding on every surface – and, that if you are looking forward to a journey, it does not necessarily depend on your destination.

Perfectly matched: the Tiptronic automatic gearbox adapts to your individual driving style and selects the shift points accordingly.

Safety.

Only a feeling of complete safety generates a feeling of being completely at ease. The Phaeton is therefore equipped with extremely efficient, perfectly matched safety technologies. The occupants of a Phaeton are protected by no less than eight airbags: two front airbags, four side airbags and two curtain airbags. All are controlled by innovative early crash sensors which are located at various points on the body. In the event of an accident they supply accurate information on the gravity and angle of the accident. Each airbag can then react precisely to a thousandth of a second, and independently of the others. In addition, in the event of a collision the active head restraints move forward automatically to minimise the distance between the head and the head restraint. This considerably lessens the risk of whiplash injuries.

Besides these safety systems, a sophisticated pre-crash concept which supports the driver at critical moments is equally important. There are many electronic helpers for the Phaeton which make the vision of a vehicle featuring anticipatory systems with foresight reality. These include the tyre pressure monitoring system available as an option and proven technologies such as ABS, ESP and TCS which are standard in a Phaeton, as is a rain/light sensor. The latter includes automatic driving light control at twilight and high speeds. Other road-users also benefit from the comprehensive safety concept of the Phaeton. This is proved by the standard automatic hazard warning light function which automatically warns following vehicles if full braking is applied. As you can see, there are many simple and logical safety features in the Phaeton which can be decisive in hazardous situations.

Safety for the head: **early crash sensors** activate the airbags in the Phaeton precisely and in a fraction of a second.

Safety for the spine: **active head restraints** lessen the risk of whiplash injuries.

Bi-xenon headlights with adaptive cornering lights and LED daytime driving lights. Built-in motors move the powerful headlights in the direction of travel thus improving illumination of the road and the side of the road, particularly on bends. In addition, when turning off, the static cornering light is activated for even better close-range lighting. Special LED daytime driving lights are switched on automatically when the ignition is operated.

The best safety strategy is to avoid dangerous situations. The Phaeton can therefore be equipped with a new generation of radar-assisted driver assistance systems – available as options – which give early warning of potential risks. Automatic distance control ACC adapts the speed selected by the driver to that of the vehicle ahead, lowering speed and coming to a standstill if necessary. The “Front Assist” area monitoring system helps to prevent rear end collisions. A radar sensor monitors the distance between the vehicle and other road-users ahead and warns you if they are approached too closely. At the same time, the vehicle is prepared in case the driver should apply the brakes fully. The sensors of the “Side Assist” lane change assist system available as an option monitor the blind spot and warn the driver if vehicles are overtaking by displaying a signal in the door mirror. The optional “Rear Assist” reversing camera gives you help when reversing. A camera transmits images taken of the area behind the vehicle to the display of the Infotainment system. In addition, lines superimposed on the display show the probable path that will be taken.

Many other features contribute to making driving the Phaeton particularly safe. For example, bi-xenon headlights with adaptive cornering lights and LED daytime driving lights which can be ordered as an option. They enable every obstacle to be recognised in good time, even in poor weather conditions. Also the running gear with standard electronic air suspension and 4MOTION all-wheel drive, which permanently optimises traction and roadholding. And last but not least, the high-tech body which is made of 16 different metals and plastics for unparalleled torsional rigidity and extremely smooth running. All these safety assistance systems have one thing in common: they not only assure more relaxing driving but also that you are more relaxed when you reach your destination.

■ standard

■ **W12** standard on W12

■ **V8** standard on V8

■ **W12 LR** standard on W12/long wheelbase

■ **V8 LR** standard on V8/long wheelbase

Safety for pedestrians: in the event of an accident, the **windscreen wipers automatically disappear under the bonnet** so that they do not present an injury risk.

Safety in rain: the **rain sensor** automatically adapts the speed of the windscreen wipers to the intensity of rainfall.

Park distance control. During parking and manoeuvring the system indicates how much space is left between the Phaeton and other vehicles or obstacles at front and rear. An acoustic and visual warning of the remaining distance is given inside the vehicle.

How useful would a safety system like automatic distance control ACC be if you had to take your eyes from the road to adjust it? Questions like these are decisive in the development of a cockpit – particularly when the car in question has as many technical features as the Phaeton. Only if they are easy to operate do they fulfil their purpose: to make driving more pleasant, more flexible and safer. Those who drive a Phaeton for the first time will be surprised how quickly each operation becomes a matter of course. Automatic distance control ACC and many other functions can be controlled with ease via switches on the 4-spoke multifunction steering wheel without taking your hands from the leather-covered or wooden rim. Circular instruments with a classic design are arranged behind the steering wheel. These are complemented by a clearly structured multi-colour multifunction display which shows the driver navigation advice and information on important parameters such as average speed, tyre pressures, or current and average fuel consumption. The centre console with shift gate and Infotainment system also has clear lines and is user-friendly. The new Infotainment unit is

particularly easy to operate. You can select your music tracks – and play films – via the 8 inch touch screen. All information can be registered at a glance. Every switch and every menu item is there where you intuitively expect it to be. This clarity is not only practical with regard to functional and ergonomic aspects but also contributes to the exemplary, elegant design of the Phaeton's cockpit as there is still plenty of space for generous wood surfaces, shiny chrome elements and fine leather trim, i.e. for everything that is pleasing to the eye. It is therefore hardly surprising that probably the most-loved feature of the Phaeton's cockpit is the analogue clock of time-less beauty.

5-seater Phaeton.

Draught-free: the standard 4-zone Climatronic can – as an option – be fitted with a rear control unit. The air conditioner can then be operated from all five seats.

W12 LR **V8 LR** **V6 LR**

Generous: the rear bench seat offers plenty of space – as does the folding centre armrest with stowage compartment and integral cup holders.

Top-level comfort means optimal relaxation. For us, comfort also means surpassing your expectations. The 5-seater Phaeton meets this requirement right from the standard specification. The many exclusive features are highlighted by outstanding workmanship, are perfectly arranged and, above all, very well thought-out. These include the “Climatronic” air conditioner with 4-zone temperature control, front seats with electric 12-way adjustment and “Pearl” pattern cloth upholstery, and select wood trim on the door strips, centre console and instrument panel. The rear of the vehicle demonstrates the difference between adequate and ample space. There is plenty of room for up to three passengers on the rear bench seat which incorporates a number of intelligent features for your comfort.

If the centre seat is not occupied, a centre armrest can be folded out to provide space for small items needed during the journey or refreshing drinks: the armrest has a compartment on the upper side and a cup holder that is extended at the touch of a button. As an option, the “Premium” rear seat package offers electric adjustment of the head restraints and lumbar support, and a massage function on the two outer rear seats. Like the two front seats, these are fitted with seat air conditioning with heating and ventilation. When it comes to your comfort, the only thing you should do without is compromise.

standard

W12 LR standard on W12/long wheelbase
V8 LR standard on V8/long wheelbase

4-seater Phaeton.

High-tech air conditioning: the 4-zone Climatronic was developed specially for the Phaeton. It works practically draught-free, creates an individual climate on each seat, and can also easily be adjusted – via a **control unit** – from the rear seats.

The **control unit for the 10-way rear seats**: this adjusts the seat surface, the backrest and the head restraint entirely intuitively. An additional button, available as an option, enables the front passenger seat to be adjusted – via a **control unit** – from the rear.

Deciding on a 4-seater Phaeton is also a decision in favour of individuality. The standard specification has little in common with the general definition of comfort. The 18-way front seats feature high-grade “Vienna Classic Style” leather trim and have a memory function that knows your sitting preferences and adjusts your seat accordingly at the touch of a button. The fact that all seats also have heating, active seat air conditioning and active lordosis support plus a massage function as standard impressively underlines the exceptional comfort offered. Other comfortable, convenient and well thought-out features are the divided, fold out centre armrests which provide space for travel requisites. Also the centre console with “Eucalyptus” fine wood decor. It extends elegantly from the rear to between the front seats and includes easily accessible controls, for example those to adjust the rear seat.

Rear passengers also travel first class in the 4-seater Phaeton – on 10-way single seats which naturally have a heating, air conditioning and massage function with convenient rear controls. You also enjoy plenty of legroom. In spite of all this comfort and convenience, there is one thing that the Phaeton cannot do for you: make the difficult decision as to whether you would rather sit in the front or rear.

 standard

Phaeton with long wheelbase.

The **vanity mirrors** are fitted flush with the headlining. Rear passengers therefore enjoy complete comfort and convenience.

W12 LR **V8 LR** **V6 LR**

The **electric sliding/tilting glass roof** supplies plenty of fresh air and light. An integral wind deflector is adjusted automatically, depending on driving speed and how far the roof is opened, to reduce wind noise and draughts. A sunblind is also fitted.

There is then no pocket for spectacles in the roof console.

W12 LR **V8 LR** **V6 LR**

Space is a very special luxury. The Phaeton with long wheelbase has plenty of this to offer. In particular, the expectations of those who mainly sit in the back of their saloon will be more than fulfilled by a twelve centimetre longer rear area length and legroom – and by the comprehensive standard equipment: sunblinds on the rear side windows and on the rear window, an electric sliding/tilting glass roof, and rear controls for the air conditioner protect against excessive heat.

This helps you to quickly forget routine and enjoy your privacy all the more inside the vehicle. This can be enlarged still further in the 4-seater version with a front passenger seat that can be adjusted from the rear seat. The Phaeton is therefore ideal as a chauffeur-driven car. However difficult you may find it to put a car like this in the hands of another driver, it is all the easier to lean back and enjoy every detail, every millimetre and every mile to the full.

Seats.

The seats in the Phaeton are more than just somewhere to sit in the back or behind the steering wheel. They are places where Volkswagen has completely redefined automotive sitting comfort. Right from the moment you get into the Phaeton, the Memory package available as an option makes this as easy as possible. It stores the individual seat adjustment, the position of the belts and mirrors, and automatically moves the steering column forwards when the Phaeton is opened.

All well thought out controls are within easy reach from the 12-way front seats. The height and angle of these seats, the backrest angle, lumbar support and the distance from the instrument panel can be conveniently adjusted with the electric control unit on the outer side of the seats. You can therefore easily find the ideal sitting position for your stature and enjoy good lateral support and optimal support for the spine.

Standard on 5-seater with long wheelbase.

V8 LR **V6 LR**

A very relaxing ride is also provided by the 18-way seats. The 18-way front seats are standard on the Phaeton W12 and all 4-seater models. An electronic massage function with active lordosis support is available as an option to gently massage the lumbar back muscles. Electronic seat air conditioning with a separate fan supplies air carefully heated or cooled to the required temperature. Sitting comfort is perfected by additional adjustments for the top of the backrest and seat depth, and electrically adjustable head restraints.

Standard on 4-seater. Only in conjunction with leather trim.

Technical features.

Many intelligent features make the Phaeton a vehicle that not only drives but also thinks, helps and gives you support. For instance, with radio remote control for locking and unlocking the vehicle. The “coming home” and “leaving home” function illuminates the surrounding area for your convenience and safety when getting in and out of the vehicle in the dark. When your Phaeton is parked in the sun for a long period of time, the solar cells of the optional sliding/tilting solar roof automatically activate the ventilation fan and regulate the interior temperature to a pleasant level. You are given support during the journey by dynamic headlight range adjustment, speed-dependent Servotronic steering, and cruise control. The right climate is assured by the 4-zone Climatronic which has air vents that open and close automatically as required. You can also be given help when parking. An automatic tilt function for the right-hand door mirror during reversing is standard on the 4-seater version so that you have an optimum view of the distance between the tyres and the kerb. Park distance control, available as an option, has barely visible sensors which give visual and audible warning signals to indicate the distance between the Phaeton and parked cars or obstacles. In addition, the “Rear Assist” reversing camera available as an option enables you to see everything behind the Phaeton.

The luggage compartment lid can be opened conveniently from the cockpit without you having to get out of the Phaeton – which you probably won’t want to anyway. It is a good thing that only a touch of a button is needed to start the Phaeton again with the “keyless access” system available as an option.

The “coming home” and “leaving home” function: getting in and out of the Phaeton is easier and safer with this function. The headlights, tail lights and spots in the door mirrors illuminate the surrounding area for up to four minutes. The Phaeton does not therefore just bring you home but takes you to your front door.

The vents for the 4-zone Climatronic are opened and closed as required in automatic mode.

Cruise control: as of a speed of 30 kph cruise control maintains the speed at the set level for additional comfort and convenience on long journeys in particular.

Control unit in the door: this operates many functions – from the electric windows to the fuel flap release.

“Keyless access”: with the “keyless access” function available as an option, the Phaeton can be started via the **starter button** without a key in the ignition lock.

The “keyless access” locking and starting system. When the door handle is touched, the electronics of the vehicle communicate with the key. The doors are unlocked and the Memory package activated even if the key is in your pocket.

Tiptronic operation. Formula 1 style gear-changing in the Phaeton with the steering wheel paddles: these facilitate ergonomic, sporty operation of Tiptronic.

Auxiliary heater with radio remote control. This heater can be activated from a distance of up to 600 metres without you having to leave the house. As a result, you have warm seats, a clear view, no misting over of the windows, and therefore top-level comfort and safety. It also protects the environment as a pre-warmed engine consumes less fuel and emits up to two-thirds less exhaust gases.

Leather-covered multifunction steering wheel with wooden rim. This wooden steering wheel rim has high-grade workmanship, a stylish appearance and a good grip. There are integral buttons for convenient operation of radio, telephone and multifunction display during the journey.

W12 **W12 LR**

Leather-covered, heated multifunction steering wheel. This practical feature has controls for multifunction display, cruise control and telephone.

Only in conjunction with heated front seats or leather trim and Memory package.

Luggage compartment lid with electric opening and closing. The aluminium hinges not only look very elegant, the integral electric motors enable you to open the luggage compartment lid from the comfort of the cockpit.

Built-in garage door opener. The opener is integrated in a console on the headlining and saves taking additional remote controls with you. It can be set to the control frequency of your electric garage door and two other systems.

Please obtain information on the applications of the garage door opener from your local Volkswagen Dealer prior to ordering this feature.

“Premium” provision for a mobile phone: this up-to-date communications tool with Bluetooth radio technology (remote SIM Access Profile, rSAP) can as an option be supplied with a Bluetooth receiver which is as versatile as a mobile phone and as user-friendly as a conventional phone. It has convenient operation via voice recognition or the Infotainment system.

Infotainment system.

The Infotainment system of the Phaeton is as easy to operate as it is to describe. It has a pleasantly logical structure and is not confusing in spite of its complexity. The standard "RCD 810" radio system already has clear sound and clear controls, and the touchscreen menu control of the "RNS 810" Radio Navigation System also functions quickly, precisely and logically giving easy, direct access to related information. By combining multiple functions in a single control panel, technology which appears to be complicated becomes an intuitive process. Or to put it another way – less elements result in more convenience.

"RNS 810" Radio Navigation System. The multi-colour 8 inch touch screen makes for easy operation. It shows you up-to-date traffic jam information and plans your route in a matter of moments. Route guidance can optionally be shown on a 2D or 3D navigation map. Even films can be played when the vehicle is stationary. The radio and 6-disc CD changer can also be controlled via the display. Audio files in MP3 and WMA format can be saved and played using the 30 GB hard disk.

The damping setting can be adjusted individually to your driving style at the touch of a finger. There is an infinite adjustment between the comfort and sport settings.

The right caller. The screen also serves as a **telephone book**. It shows, among other things, the name of the caller from a list of up to 1,000 telephone book entries.

TV reception: this makes it possible to receive analogue and digital television (DVB-T) with excellent picture and tone quality when the vehicle is stationary. Should there be no digital signal, or if the signal is too weak, the tuner switches over automatically to analogue reception.

Picture only when vehicle is stationary.

“Climatronic” air conditioner with 4-zone temperature control.

There is not only a great difference in temperature between hot and cold but also between each individual’s perception of temperature. The air conditioner is unparalleled in respect of function and comfort. The climate and temperature for each vehicle occupant’s seat can be selected independently of the other seats. The 4-zone Climatronic also has virtually draught-free operation. The air conditioner’s electronic control automatically registers all relevant factors – such as the position and intensity of the sun, and outside temperature. It supplies either more or less cool air accordingly – naturally individually for each seat as required. A sensor continuously measures humidity inside the vehicle and corrects it automatically if necessary. Operation via the air conditioner control unit in the clearly arranged Infotainment system is self-explanatory. You can therefore easily create four different climate zones in your Phaeton at a few touches of a button.

Thanks to MEDIA-IN (not illustrated) audio files from data storage units and MP3 players with USB certification can be played via a USB interface. An Apple iPod of the fourth generation upwards can also be connected using an adapter cable.

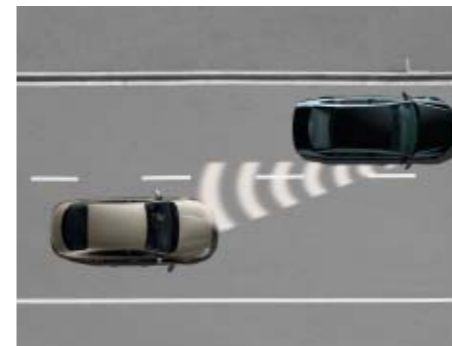

The **audio system**. The entire interior of the Phaeton is the equivalent of the first row of seats in a concert hall. The balanced audio technology of the Phaeton results in an incomparable sound experience whichever seat you are sitting on. The two audio systems available were designed especially for the interior geometry of the Phaeton. The 8-channel amplifier of the 8/10 audio system supplies 190 watts to ten loudspeakers. The standard CD changer is in the glove compartment and can take six CDs. The optional “DYNAUDIO Temptation” sound system offers precision sound and features a 12-channel digital amplifier which supplies up to 1,000 watts to twelve high-performance loudspeakers. This special sound experience can be finely adjusted via the Infotainment system – exactly to your taste.

The “DYNAUDIO Temptation” sound system guarantees an unforgettable sound experience throughout the interior. Completely new loudspeaker technology has been developed for this system which delivers precise bass tones, natural medium-range tones and crystal clear trebles that set standards. Together with the 1,000 watt digital amplifier, this is a system that every music lover will applaud.

Comfortable and convenient optional extras.

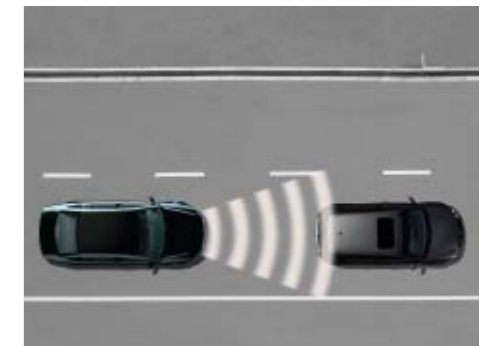

There is only one person who knows your requirements even better than we do – you yourself. We therefore offer you tailor-made optional extras, both technical features and extras for your comfort and convenience, so that you can equip your Phaeton to your specific wishes – from an intelligent Memory package to elegant Burr Walnut.

“Side Assist” lane change assist system. As of a speed of 30 kph the system recognises vehicles in the blind spot and warns you of possible dangers via an optical signal in the door mirror.

With the **“Rear Assist”** reversing camera you have an optimal view of the area behind your Phaeton. The camera images are shown on the display of the Infotainment system together with lines indicating the path of travel when reversing.

Automatic distance control ACC and “Front Assist” area monitoring system. The system adapts the speed selected by the driver to that of the vehicle ahead and maintains a constant distance. If “Front Assist” registers that another vehicle is approached too closely, it warns the driver in two stages: first a visual and acoustic warning, and then a brief application of the brakes.

Extended wood package: whether you opt for “Eucalyptus”, “Poplar Grain”, “Vavona” or “Burr Walnut” – this package assures a very special ambience. It includes wood inserts for the grab handles and a second wooden trim strip on the door armrests.

The **electric sunblind** on the rear window is available on its own or in a package with manual blinds on the rear side windows. The special structure of the blinds transforms the glare of the sun into soft light – and still gives a good view.

W12 LR V8 LR V6 LR

The **Memory package** for the 12-way seats stores the individual seat adjustment, also the position of the steering column, rear view mirror, door mirrors and seat belts. These adjustments are made again automatically when the vehicle is opened via radio remote control.

W12 W12 LR
Standard on 4-seater.

The **integral blinds on the rear side windows** have manual operation and protect the passengers from direct sunlight.

W12 LR V8 LR V6 LR

The **sliding/tilting solar roof** offers a very special function: the integral solar cells supply the ventilation fan with current even when the ignition is switched off. This significantly lowers the temperature inside the vehicle on hot days.

Our vehicles are equipped with summer tyres as standard. As of 1st May 2006 you are required by law in the Federal Republic of Germany to adapt the equipment of your vehicle, in particular the tyres, in wintry weather conditions. Your local Volkswagen Dealer will be pleased to advise you.

“Volkswagen Individual”.

The unique comfort of the Phaeton is due in part to the versatile features offered by “Volkswagen Individual”. From paint finishes, wood decor and leather to wheels, individual multimedia equipment and a built-in fridge – you can decide what makes a Phaeton your very own Phaeton. If you are able to make up your mind.

The “Individual” “Sensitive Classic Style” leather package in Tobacco/Anthracite.

The “Individual” “Sensitive Classic Style” leather package in Sun Beige/Anthracite.

The features illustrated apply to the German market. Your local Volkswagen Dealer will be pleased to give you details of the differences in your specific country. Please refer to www.volkswagen-individual.de for further information.

Four 8½ J x 19 "Serres" alloy wheels, 245/45 R 19 tyres, painted in Sterling Silver.

Also available as additional winter wheels with 245/45 R 19 V winter tyres.

Four 8½ J x 18 "Aristoteles" alloy wheels, 255/45 R 18 tyres, bright finish.

Four 9 J x 19 "Omnynt" alloy wheels, 255/40 R 19 tyres, bright finish.

Not for W12/W12 with long wheelbase.

Four 8½ J x 19 "Helios" alloy wheels, 255/40 R 19 tyres, painted in Sterling Silver.

Not for W12/W12 with long wheelbase.

The Alcantara package: this package includes the headlining trim, sun visors and roof pillar trim, and underlines the elegance of the interior.

Not for long wheelbase. Only in conjunction with park distance control or reversing camera. Not with Corn Silk Beige interior trim.

Stowage net in front passenger footwell: small items can be stowed here safely for easy access during the journey.

The fridge: your refreshments can be kept in the illuminated 17.5 litre compressor fridge for the 4-seater, and in the 9 litre compressor fridge for the 5-seater.

High-end multimedia system: two screens in the front head restraints and a 6-disc DVD changer in the luggage compartment assure your entertainment. The system is MP3-compatible and designed so that external appliances such as games consoles can be connected. It is operated via infrared remote control or by buttons on the monitor.

Only in conjunction with TV reception and de luxe front seats.

Paint finishes.

There are some 8,100 individual parts in the Phaeton. Every single one has been built to fully meet your expectations. Top-grade paints give these components their unmistakable appearance. A special 2-layer paint finish is available as an option: piano lacquer has exceptional depth and brilliance giving your Phaeton an exclusive appearance that will be a lasting pleasure.

Fabrics, leather and wood.

Comfort is a feeling that is difficult to put into words but can be found in select fabrics, the finest leather and handpicked wood. This results in an interior that leaves nothing to be desired. High-grade cloth upholstery with the appearance of cashmere awaits you, also soft leather that has been refined in the course of 40 different processes and, with more than 100 seams set by hand, is also especially durable. Fine wood inserts made from trees that have grown for up to 70 years in a mild Pacific climate are also carefully worked by hand. This is only one of the many features that you have to experience in order to be able to describe them.

Paint finishes, leather and wood from “Volkswagen Individual”.

Volkswagen’s expertise and experience are to be found in each and every Phaeton. Select materials are hand-worked to create vehicles of a unique quality but it is you who gives the Phaeton an unmistakable character. When it comes to the paintwork “Volkswagen Individual” offers a very special option: on request, your Phaeton will be painted in the exact colour of your choice. After all, it is often only small nuances that make a big difference.

Die Gläserne Manufaktur (The Transparent Factory).

Die Gläserne Manufaktur. The home and birthplace of the Phaeton is Dresden whereby home describes a feeling rather than a place – the feeling of having ties with and belonging to a town with a special artistic and cultural ambience. Many impressive buildings shape the skyline and atmosphere of this town on the River Elbe, a town with a centuries-old tradition of craftsmanship and manufacture. The first white porcelain in Europe was created here in 1709; the first German locomotive was developed here in 1836 and, 100 years later, the first miniature reflex camera in the world. This tradition meets the modern age in “Die Gläserne Manufaktur”. For more than seven years, vehicles are built here that meet the most exacting requirements in respect of materials, workmanship, technological perfection and comfort.

Each vehicle is made by hand employing innovative manufacturing methods modelled on traditional craftsmanship. This combination of technological intelligence and human skill results in a car with a unique character: the Phaeton. This contemporary Dresden masterpiece puts a new slant on the great manufacturing history of Dresden.

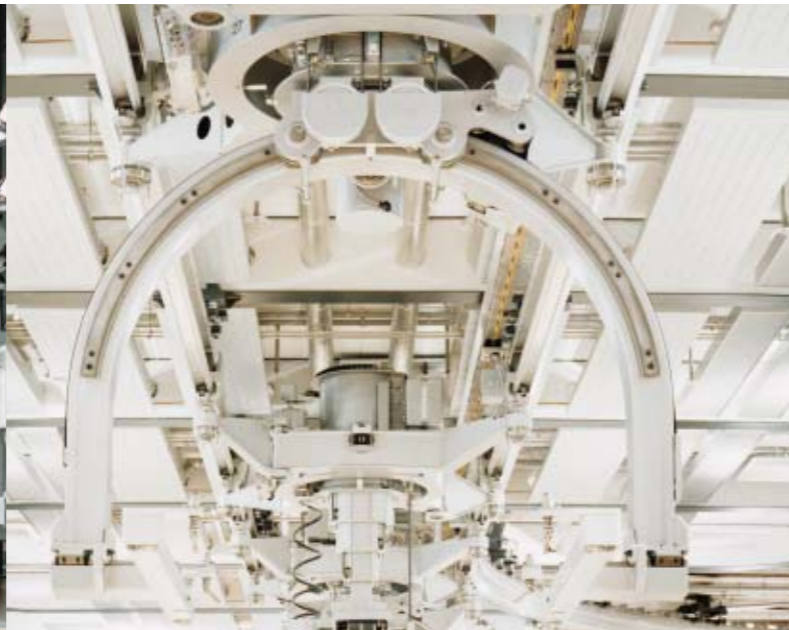

At the same time, “Die Gläserne Manufaktur” establishes a new automotive culture: a globally unique combination of manufacturing and communications experience. The manufacture of a car can be seen and experienced here in unparalleled transparency. During guided tours, visitors receive an immediate insight into the assembly of a Phaeton.

They see an out of the ordinary production plant with parquet flooring and walls of glass that has little in common with conventional car factories. There is an atmosphere of calm, clarity and cleanliness. Bodysells move noiselessly through the individual production sections. Employees dressed in white and wearing gloves pass components into the vehicles. The parts are supplied by a driverless transport system that glides across the parquet floor.

All visitors have access to the customer forum, at the centre of which is the Kugelhaus, where they gain further insight into the fascinating process of building a car. Media installations inside the Kugelhaus and a virtual production sequence on the upper level, the Orangery, are also interesting sources of information.

Here several screens show video sequences of production sections that cannot be seen from outside. Below the Orangery is another exhibition area where visitors can experience and enjoy Volkswagen’s luxury segment first hand and at length. They can view and examine the Phaeton on display here inside and out. Models and exhibits show interesting details of the vehicle together with samples of fabrics, leather, paint and wood which give an impression of the exceptional quality of this car.

It is also possible to collect vehicles at the Autostadt in Wolfsburg. Please refer to www.autostadt.de for details. Customers outside the Federal Republic of Germany: please get in touch with a Volkswagen Dealer in your country to enquire about the possibility of collecting a vehicle and to receive the relevant details.

Customer care at “Die Gläserne Manufaktur”. “Die Gläserne Manufaktur” not only takes a new approach to vehicle production. It also sets new standards with a unique customer care programme for customers and prospective buyers. You receive the undivided attention of your personal customer manager who gives individual, competent advice and, if you wish, accompanies you on a test drive. If you are interested in a Phaeton, you can contact your local Volkswagen Dealer with your order. They will get in touch with your contact person at “Die Gläserne Manufaktur” who then plans your visit with you. This includes extensive advice in choosing your new vehicle and the handover of your Phaeton in a fitting setting. You will be welcomed in the lounge of the customer lobby, an area reserved exclusively for you. This

is followed by a visit to the Studio to view fabrics, leather, paint, wood and wheels – a display only available to you there where the Phaeton is assembled – which enables you to plan your individual Phaeton straightaway on the car configurator. Here again, your customer manager will be pleased to help you. Afterwards you experience a tour of production – a privilege reserved solely for customers and prospective buyers. If you wish, you can follow the assembly process of your Phaeton first hand and see how the equipment you have ordered is put together in your individual Phaeton. If you wish, you can speak to the experts who assemble your car by hand. After your Phaeton has been presented to you in the special atmosphere of the Salon, the operation of your new vehicle will be explained to you in detail.

If you would like to take the opportunity to go sightseeing in Dresden when you visit “Die Gläserne Manufaktur” or when you collect your vehicle, our travel service will be pleased to arrange a comprehensive programme of events for you – whether you would like to book tickets for the opera or the theatre, to go on a tour of Dresden or the surrounding area, or visit a museum. Even if you have already visited “Die Gläserne Manufaktur” to collect a Phaeton, it is not unlikely that we shall soon be able to welcome you again – maybe at one of the many unique events to which customers and prospective buyers from all over the world are invited every year. We look forward to seeing you!

The mobility package.

The Phaeton PremiumPackage. Time is one of the greatest luxuries there is nowadays. The PremiumPackage for the Phaeton saves time for you as it also relieves you of many tiresome tasks. Four comprehensive modules and a versatile credit card are included for you in this unique Service Package from Volkswagen Bank, Volkswagen Leasing and Volkswagen VersicherungsService. You do not have to see to the insurance, maintenance or organise legal formalities – all this is dealt with for you automatically.

“Premium” insurance rate. Take advantage of comprehensive “Premium” protection for all new Phaeton vehicles. This includes third party vehicle insurance with a sum insured of 100 million euros, comprehensive insurance riders, and cover for drivers. This compensates, for instance, for loss of earnings as the result of an accident or a pension reduction up to the sum of 1 million euros. In addition, the “Premium” insurance rate has extensive comprehensive and third party, fire and theft insurance including no claims discount protection and parking damage insurance.

The no claims discount protection gives you cover for one claim per year under third party and/or comprehensive insurance to protect you from an increase in your insurance premium. Parking damage insurance ensures that annoying parking damage not exceeding 500 euros on vehicles of up to 24 months old is repaired without loss of no claims discount and with a reduced excess

payment. In addition, in the case of claims under comprehensive insurance in Germany, a comparable rented car is made available to you. In the event of a write-off within 24 months of the vehicle’s date of first registration, you are reimbursed with the price of the new vehicle. As you can see, Volkswagen Versicherungs-Service gives you, as a Phaeton driver, support with particularly extensive insurance cover.

Premium services module. The PremiumServices module covers all maintenance work and servicing for your Phaeton – from regular inspections with oil change, replacement of seal/filter to the regular replacement of wear and tear parts, and examination of the vehicle including exhaust emission testing by the vehicle testing authorities. Use of this module saves all leasing customers time and effort and, due to the fixed cost plan, money too.

Premium tyre module. Together with your new Phaeton you receive, in addition, four winter tyres on alloy wheels. The seasonal tyre change at your Volkswagen Dealer is also included. We even undertake the correct storage of the second set of tyres – so that only your Phaeton is standing in your garage.

Premium fee and charges module. This Phaeton PremiumPackage module deals with all road tax and radio/TV licence fees for you. We make sure that the State receives its dues. Simply send us your road tax notification and think about something else – your next trip in your Phaeton for example.

Volkswagen VISA Card. The Volkswagen VISA card is your card for the greatest financial flexibility. Whether at home or abroad, enjoy the possibilities offered by cash-free transactions. Take advantage of valuable discounts and an attractive turnover bonus – to save hard cash!

1% when refuelling: simply pay with the Volkswagen VISA card at filling stations worldwide and receive a discount of 1%. So fill up and save.

5% for travel: book your holiday via the Volkswagen Bank travel centre and you receive 5% of the price back. This applies to package tours from all well-known travel firms with independent advisory service.

Up to 20% from Europcar: drive and save. Whether you hire a Cabriolet or a van for removals – you receive a discount of up to 20% for vehicles hired from Europcar.

Further information can be obtained via the Internet: www.volkswagenbank.de

or by phone: (0180) 322 42 22 (0.09 €/minute from the DTAG landline; prices may differ for calls from mobile phone networks) from 8 a.m. to 8 p.m. Monday to Friday, and from 9 a.m. to 3 p.m. on Saturdays.

Phaeton financial services. A car that is so consistently tailored to the wishes and requirements of its owners naturally also offers a choice of individual finance plans. Either the Volkswagen Bank “ClassicCredit” or a leasing contract from Volkswagen Leasing. Leasing a vehicle has clear advantages: it leaves capital free; expenditure is calculable over a fixed period; and simply the possibility, through attractive conditions, to tie up less money and get more car – and just give the car back to your Volkswagen Dealer at the end of the contract. Whether your Phaeton is for private or business use: you will make the right decision with Volkswagen private or business car leasing.

We shall be pleased to answer any queries you may have concerning the Phaeton. Please phone: **01802-PHAETON** (01802 - 7 42 38 66) (0.06 €/per call*).

Phaeton Service. Good service is virtually invisible but immediately there when needed. The services offered for the Phaeton are entirely in line with this. As the driver of a Phaeton many services

are available to you, in addition to Volkswagen’s proven service, which more than do justice to what is expected of a luxury saloon. Service for the Phaeton starts there where you want it to. For example, there is no need to leave the house for a workshop appointment. Our exclusive collection and delivery service is only a phone call away. Your Volkswagen Dealer then collects your Phaeton from your home and brings it back to you again when work has been completed. If you wish, a replacement car from your Volkswagen Dealer is also available so that you remain mobile in the meantime. Driving a Phaeton means never being on your own. Should you have any queries concerning your Phaeton, just call the hotline and the Phaeton Service personnel will be pleased to answer them.

Concrete help is also given. There is a network in more than 20 European countries to help you in an emergency and give assistance in dealing with all eventualities. For instance, if you lose your car key: we will arrange for you to receive a previously deposited second key as quickly as possible. The same applies to urgently needed medication or important documents. Should your Phaeton have a breakdown or be involved in an accident in another country within Europe, simply call your personal hotline. Phaeton Service immediately deals with everything needed for speedy processing in more than 20 European countries: on-the-spot repairs for the Phaeton, a replacement car, or hotel accommodation for up to five days for you and those travelling with you. If necessary, we help you to find important contact persons such as a solicitor, interpreter, doctor or other experts. As you can see – a staff of experts, helpers and advisers is there for you around the clock so that you can concentrate entirely on the essentials: relaxed, comfortable and problem-free travel.

Volkswagen driving experience. As the name implies, Volkswagen driving experience stands for experience that you can make use of in the course of everyday driving. The training offered ranges from driving and safety training to exclusive on-road training where you are given tips by professional instructors. Advanced safety training teaches you how to react correctly in dangerous situations and, during Winter training, you can learn how to keep your vehicle under control on slippery surfaces. However, Volkswagen driving experience also stands for lasting memories of special event travel. We shall be glad to give you details of the complete Volkswagen driving experience programme.

Please contact us by phone on our free hotline in Germany: **0800/8 93 83 68** or via the Internet: **www.volkswagen-driving-experience.de**.

*From the landline network of Deutsche Telekom AG; prices may differ for calls from mobile phone networks. The services offered on these pages apply to the German market only. Your local Volkswagen Dealer will be pleased to give you details of the differences in your specific country.
